## BORACAY TRAVEL ADVISORY

November 28, 2013

It's business as usual in Boracay Island. All beach and marine sports activities have been back to normal since more than two (2) weeks ago.

Hotel/Resort operations along the main road are energized by electricity on rotational basis (partly electric power, partly generator) which results to occasional slowing down of internet connections. Tourist establishments along the beachfront operate mostly on generator sets.

Hope is running high for Boracay Island to be fully energized on or before Christmas as power institutions are working double time to restore electricity.
